

2018 micro-meridian therapy Training Course by TCM expert

1, Theme: micro-meridian therapy

Micro-Meridian is the human body, hands, feet of the tiny meridian. Each micro-meridian is corresponding to the tendons in the body, so the abnormal of the large-meridian of the body also causes the abnormality of the micro-meridian. Conditioning micro-Meridian, can make the body of the large meridian back to normal, in order to relieve the pathological state of the body. The use of micro-meridian conditioning method, that is, simple, fast and good effect.

2, The purpose:

The purpose of this training is to enable students to master the characteristic techniques and operation methods of TCM micro-meridian therapy for common and frequently-occurring diseases, to exert the advantages of "simple, easy, inspection and low" of TCM, to popularize and apply them in medical service organizations, so as to achieve the prevention and treatment of common diseases, reduce medical expenses and relieve the burden of patients.

3, The Speaker: Dr Xueshen Bian

4. Training Contents:

- (1) the core principle of micro-meridian therapy;
- (2) core techniques of micro-meridian therapy;
- (3) Micro- meridian manipulation to regulate neck pain; shoulder pain; lumbago; leg pain; headache;
- (4) Micro- Meridian Therapy Case Study.

5, Training information 7 hours CPD

- (1) **Time:** 9:00-12:00am, 1:00-5:00pm, Saturday, 20/10/2018
- (2) **Location:** Foochow Centre (Christchurch), 303 Riccarton Road, Christchurch
- (3) **Fees:** \$ 150 per person (Internet Banking: 06-0665-0443033-00)
- (4) **Contact details:** 0212304718 (Sunny Qin)
E- Mail: office@tcmchristchurch.com
Address: TCM Chinese Medical Centre,
285 Riccarton Road, Christchurch.

The presenter's profiles:

Xueshen Bian, The founder of the micro-meridian Therapy, Beijing Pioneering Research Institute of Non-drug therapy, the deputy chairman of Chinese Traditional Medicine Association, Vice President of China Association of Bone Injury, vice chairman of the Chinese Traditional practice committee, Expert of Chinese Traditional Medicine Association TCM health.

While learning to be cautious old Chinese medicine after many years of clinical fully verified a lot of difficult diseases, "micro-meridian treatment" of the conditioning can be quickly restored physiological status. " micro-meridian diagnosis and Treatment " is still a domestic and foreign initiative, there is no second " micro-Meridian " theory and the monitoring bed. The "micro-meridian treatment" also filled a blank for non-drug therapy.

While learning to be influenced by family heritage, he has studied Traditional Chinese medicine since the last century, and developed the "foot Reflexology Method" to study a plurality of foot reflex zones (existing 200 foot reflex area), and write "contentment", greatly expanded the foot reflex area to treat disease and disease.

After more than 30 years of research, study, clinical, accumulated tens of millions of words of study notes, medical records and thousands of various hand-drawing, research, clinical application of "foot-toe diagnosis and treatment", "nail diagnosis", "pain therapy" and other methods of diagnosis and treatment, recorded the experience of learning Chinese medicine and growth process.

After painstaking research "meridian", lasted more than 30 years, combined with clinical practice, the creation of "micro-meridian Therapy", do not take medicine, not injections, only in the patient's hand or foot, away from the diseased parts, apply simple press, knead, push, press, pinch, shake and other techniques for conditioning, immediate, effective.

Good at: neck and shoulder leg pain, digestive system, gynecology, respiratory system, cardio-cerebrovascular, etc. All patients who have undergone the treatment of "micro-meridian therapy" almost absolutely marvel at the effect of the rapid effects of the good, "micro-Meridian treatment Method" for non-drug therapy to add color, become a miracle in TCM diagnosis and treatment.

micro-Meridian Origin:

according to the <Nei Jing>, the abnormality of organs will react below the elbow and knee, and can be conditioned in these areas to achieve normal physiological state. Knowing about the Internal organs of human body (heart, spleen, liver, lungs and kidneys) and the human limbs (hands, feet) between the relationship and position, as well as the bones of hands, feet, by ways of pressing, pressuring, rubbing, pushing, spinning, Pull and other methods, the body's deep abnormalities to regulate, remove disease, return to normal physiological state.

"micro-Meridian treatment" principle:

01. The theory of holographic: The name of holography begins with physics, that is, " All information ". Part is the epitome of the whole, part of the whole information, and the part is equal to the information contained in the whole. Holographic concept has been widely used in the field of medicine. such as, ear has all the information of the human body, the human ear from the morphology of the body is inverted in the embryo, the ear of each point (area) and the body of the various tissues and organs correspond to, this is reflected holographic phenomenon in the human body.
02. The principle of the theory of neural reflex: the systems of human body can keep close contact with each other, and make and coordinate, rely on complex body fluids, nerves and other systems to complete. Human body surface and viscera everywhere have receptors, when the receptors by the external environment or the stimulation of the body lesions, will cause nerve impulses, along the afferent nerve to the central nervous system, from the central nervous system analysis, synthesis of new reflection and then along the efferent nerve to the organs, glands or muscles, make the corresponding response.
03. The theory of Meridian: The theory of meridians is a doctrine that studies the interaction and influence of each part of human body, and also explains the physiological activities and pathological changes of human body. " meridian " is the general term of the meridians and collaterals in the human body. Meridian is composed of meridians and collaterals, including 12 meridians, 12 by the other, and eight veins of Qi.

04. The principle of microcirculation: Microcirculation is the basis of the circulatory system unit, is the end of the arteries and the beginning of the vein, the formation of the reticular capillary structure, which blood flow called microcirculation, is a part of the body's organs, is the body's visceral functional structure units.

05. The principle of micro-meridian: Micro-Meridian Rib is the human body's four limbs, hands, feet of the tiny meridian. Each micro-meridian is corresponding to the tendons in the body, so the abnormal of the large-meridian of the body also causes the abnormality of the micro-meridian. Conditioning micro-meridian, you can make the body of the large meridian back to normal, in order to relieve the pathological state of the body. The use of micro-meridian conditioning method, that is, simple, fast and good effect.

The advantages of "micro-Meridian treatment":

- 1, quick effect, conditioning at that time patients can experience the efficacy.
- 2, the whole body disease all only in the hand or the foot treatment, away from the lesion site, therefore holds the safety, does not have any side effect.
- 3, without any trauma as the operator only with both hands thumb tip in the patient's hands or feet, with strong osmotic stimulation, and insufficient Ben Force, so no table, in trauma.
- 4, without any auxiliary tools, so that the conditioning is much simple.
- 5, Cure root, not only pain, and can remove root cause.
- 6, Convenient, no place, anytime, anywhere, any posture can be operated.
- 7, Because the operation is simple, the physical exertion is very small, the treatment of the year too large can also be operated, which prolongs the working life of the administering person.
